Title: Perfect score:

1 KLVFFA 6 Sequence:

BLOSUM62 Gapop 10.0 , Gapext 0.5 Scoring table:

1391452 seqs, 329044822 residues Searched:

1391452 Total number of hits satisfying chosen parameters:

Minimum DB seq length: 0 Maximum DB seq length: 2000000000

Post-processing: Minimum Match 0%
Maximum Match 100%
Listing first 65 summaries

Database :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 12, Application US/09867847A

Sequence 12, Application US/09867847A

GENERAL INFORMATION:

APPLICANT: Chalifour, Robert

APPLICANT: Chalifour, Robert

APPLICANT: Kong, Xiand;

TITLE OF INVENTION: Vaccine for the Prevention and Treatment

TITLE OF INVENTION: of Alianier's and Amyloid Related Diseases

FILE REFERENCE: 50291/005001

CURRENT PLING DATE: 20091-05-29

PRIOR FILING DATE: 2000-11-5-29

PRIOR FILING DATE: 2000-11-29

PRIOR FILING DATE: 1999-11-29

NUMBER OF SEQ ID NOS: 65

SOFTWARE: FastsEQ for Windows Version 4.0
